

## Rare Disease Functions/College for Genetics & Rare Diseases Working Group

### MISSION

- Unite all bodies (governmental bodies, regional networks, hospital functions and patient organisations) involved in rare diseases by acting as a **national overarching platform** facilitating communication, collaboration, and harmonization of efforts in the field of rare diseases.
- Exchange **information** on a regular basis on different aspects of rare disease and make it **accessible and useful** to patients with rare diseases and their relatives, and healthcare providers and this to ensure optimal alignment and stimulate collaboration.
- **Raise awareness** for rare diseases, including aspects such as medical, psychosocial, ethical, legal and societal aspects, by educating, interacting, and communicating with health care professionals, policy makers and society.
- Enhance, stimulate, and contribute to a strategy for **state-of-the-art holistic, multidisciplinary care** for patients with rare diseases and their relatives.
- Stimulate and enhance the impact of rare disease research by acting as a **national interface for rare disease research**
